Dear Mr. D'Amico,

During its 15 July meeting, the Commission reviewed and approved the final design details for the Visitor Registration Buildings at the 16th Street and Elder Street gates to the main section of the Walter Reed Army Medical Center. The members were pleased with the detail refinements to canopies on the buildings. The Commission looks forward to the review of future projects for the Center including any additions or alterations to these security facilities. As always, the staff is available to assist with the next submission.

Sincerely,

Frederick J. Lindstrom
Acting Secretary

Michael A. D'Amico
