RE: Sign Plan Review Request – Lumen Salon, 1500 Wisconsin Avenue NW

Dear Members of the Commission,

On behalf of Lumen Salon, we respectfully submit this request for review and approval of permanent exterior signage for our storefront located at 1500 Wisconsin Avenue NW, Washington, DC 20007.

Our salon occupies a prominent corner location at the intersection of Wisconsin Avenue NW and P Street NW in Georgetown. We are requesting approval to install permanent business signage on both street-facing sides of our storefront to provide clear identification and visibility from each street.

The proposed signage has been thoughtfully designed to complement the architectural character of the building and the surrounding Georgetown neighborhood. Our goal is to establish a tasteful, professional storefront presence that respects the historic aesthetic of the area.

Enclosed for your consideration are detailed signage plans prepared by our sign company, including specifications and installation details, along with aerial images illustrating the storefront location and proposed signage placement.

In regards to signage at 1502 Wisconsin Ave NW, that signage has already been approved and we request no change. The signage is at a different location, and not visible from the 1500 facade storefront.

We appreciate the Commission's time and consideration of our request and look forward to receiving your feedback and approval. Please do not hesitate to contact us should additional information or documentation be required.

Sincerely,

Shana Brown

Washington, DC 20007

We intend to retain the existing, previously approved awning and signage at 1502 Wisconsin Avenue NW, as it will continue to serve an active building entrance. Due to the building's three-sided configuration, the awning and signage are not visible from the separate entrance at 1500 Wisconsin Avenue NW or from the Wisconsin Avenue frontage of that entrance. Additionally, the awning provides valuable shelter from weather for pedestrians waiting at the crosswalk.

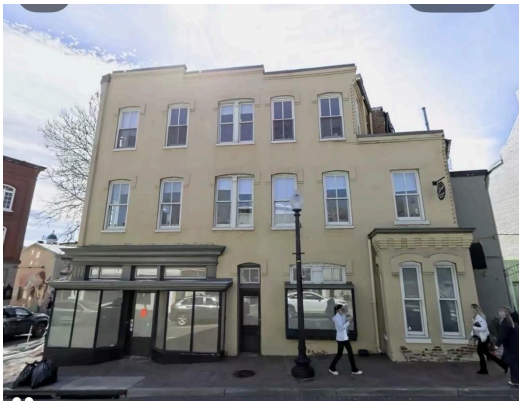

Below are images of the building illustrating its three-sided configuration and confirming that the existing signage at 1502 is not visible from 1500 Wisconsin Avenue NW or its Wisconsin Avenue frontage.

P Street/Wisconsin Ave

\- Only visible traveling S/E towards M street
